Tips for Riding Elevators During Covid-19

1. **Do** take the stairs, if you are able
2. **Do** maintain social distancing
   - **Don’t** ride a crowded elevator, wait for the next one
3. **Don’t** be impolite but ask others to wait if they try to get on a crowded elevator
4. **Don’t** lean against the walls
5. **Do** cover fingers with a cloth or glove
   - **Don’t** directly touch the buttons or handrails
6. **Do** wash your hands immediately after each trip

Elevator sizes vary. It is important to assess the number of riders before you enter. Don’t touch surfaces and clean your hands immediately after exit.

For more tips on protecting yourself around others, see [CDC](https://www.cdc.gov) guidelines.
